About Us

Futuro Boats - Luxury yachts and motorboats

FUTURO BOATS is a young in spirit, experienced company offering luxury motor yachts and boats for sale, the high quality of them is a guarantee of durability. In a modern equipped manufacturing plant located on the coast of the Baltic Sea we create beautiful, solid and ecological motorboats with conventional or electric drive, to meet the requirements of lovers of freedom on the water.

“Genius can only breathe freely in an atmosphere of freedom”

John Stuart Mill

Philosophy

The key idea of FUTURO BOATS is to achieve and improve the timeless design of our boats while maintaining high utility standards. When building our motorboats, we remember about the most important thing – your desire to have beautiful, solid equipment, made of the most durable materials. We help our recipients to fulfil their dreams and experience true freedom on the water. We believe that you are the author of the best vision of your future freedom!

Lifetime

Very high material durability, good corrosion resistance and other advantages of aluminium make the hull last up to 40 years. This longevity results in low loss of value and high resale value.

Environmentally friendly

It is important for us that aluminium production waste and hulls are 100% recyclable after the end of their operation, which makes it an environmentally friendly material.

Fire safety

The use of marine aluminium also means greater safety. Aluminium does not burn, which is a significant advantage over other oil-based boats.

Material

Aluminium is malleable, so it has the ability to withstand deformation and does not break. The use of durable aluminium means less damage risk, and if a damage does occur, repairs are easy.

UV resistance

Marine aluminium is a material that is perfectly resistant to UV radiation. Long exposure to the sun will not adversely affect the boat's structure or appearance.

Weight

Marine aluminium allows for the construction of boats to be 40% lighter than those made of carbon fibre and 55% lighter than steel boats. As a result, aluminium boats are faster, more economical and easier to transport.

A man wearing a yellow jacket, a beanie, and sunglasses is operating a green boat on a body of water. The boat has a black canopy and a yellow stripe. In the background, there is a modern building with large glass windows and some trees. The water is dark and reflects the light.

ZX20

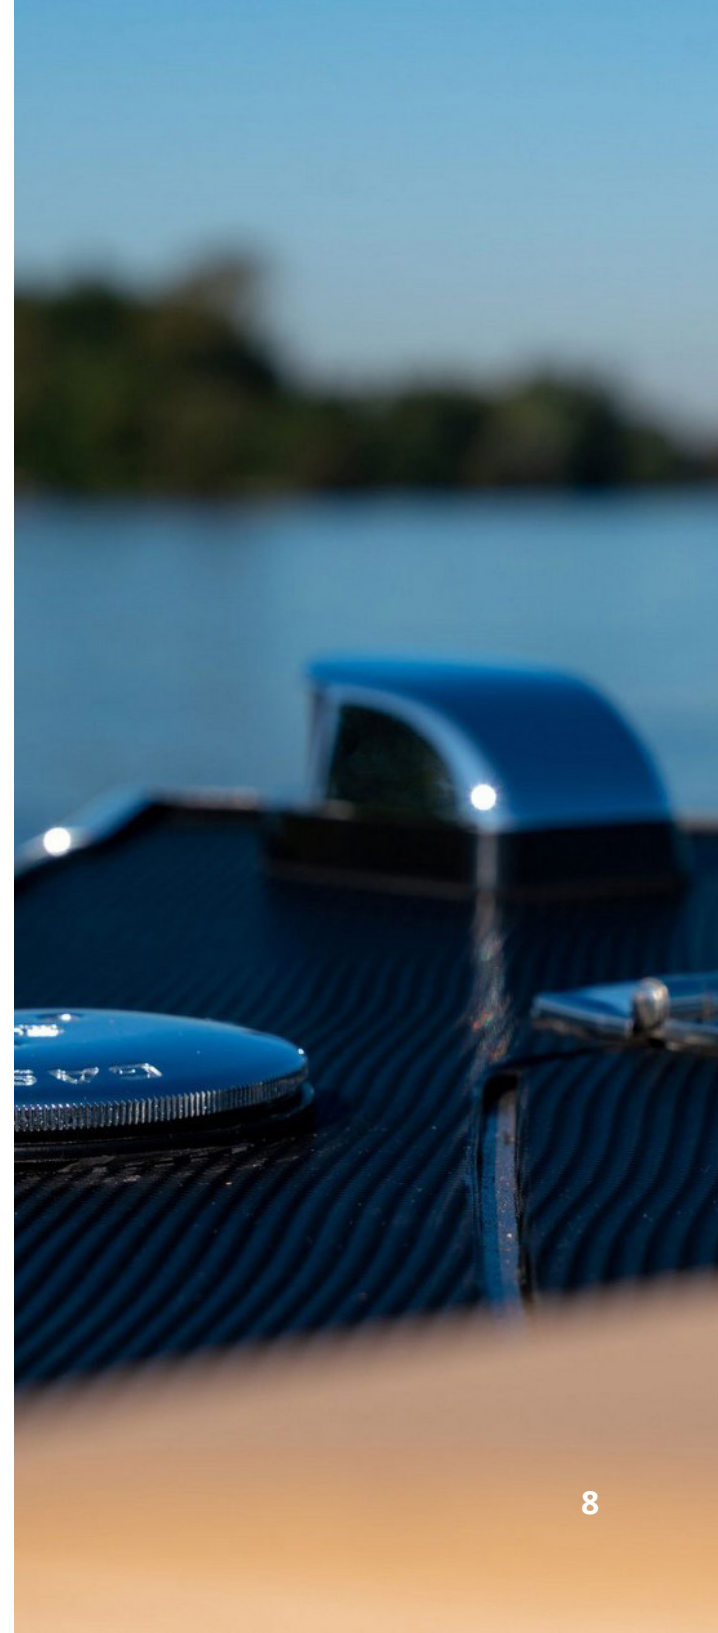

Aluminium motorboat the ZX20 model

The smallest in the ZX series - the ZX20 aluminium motorboat - is a functional vessel powered by an outboard engine, offering eight passenger seats, a dining area and a bathing platform.

Specification

Length	6 m
Width	2.0 m
Weight	700 kg
Draft	0.2 m
Engine	max 115 HP outboard engine or electric engine
Material	marine aluminium
Capacity	8
Category	C E

An aluminium motorboat – small, but with great possibilities

The exceptionally functional aluminium motorboat model ZX20 has been designed for mobility in land transport and comfort of use on the water. The table located in the bow part of the vessel can be quickly transformed into a lounger and the ladder mounted on the bathing platform allows for easy boarding after swimming.

Minimalist design

This model fits into the canons of minimalist design, while designing it we wanted to provide a large space on the deck while maintaining the small dimensions of the boat.

The weight of the boat is only 700 kg, it gives very good speed performance while using the maximum engine power of 115 HP. There are gasoline and electric engines to choose from.

ZX20L

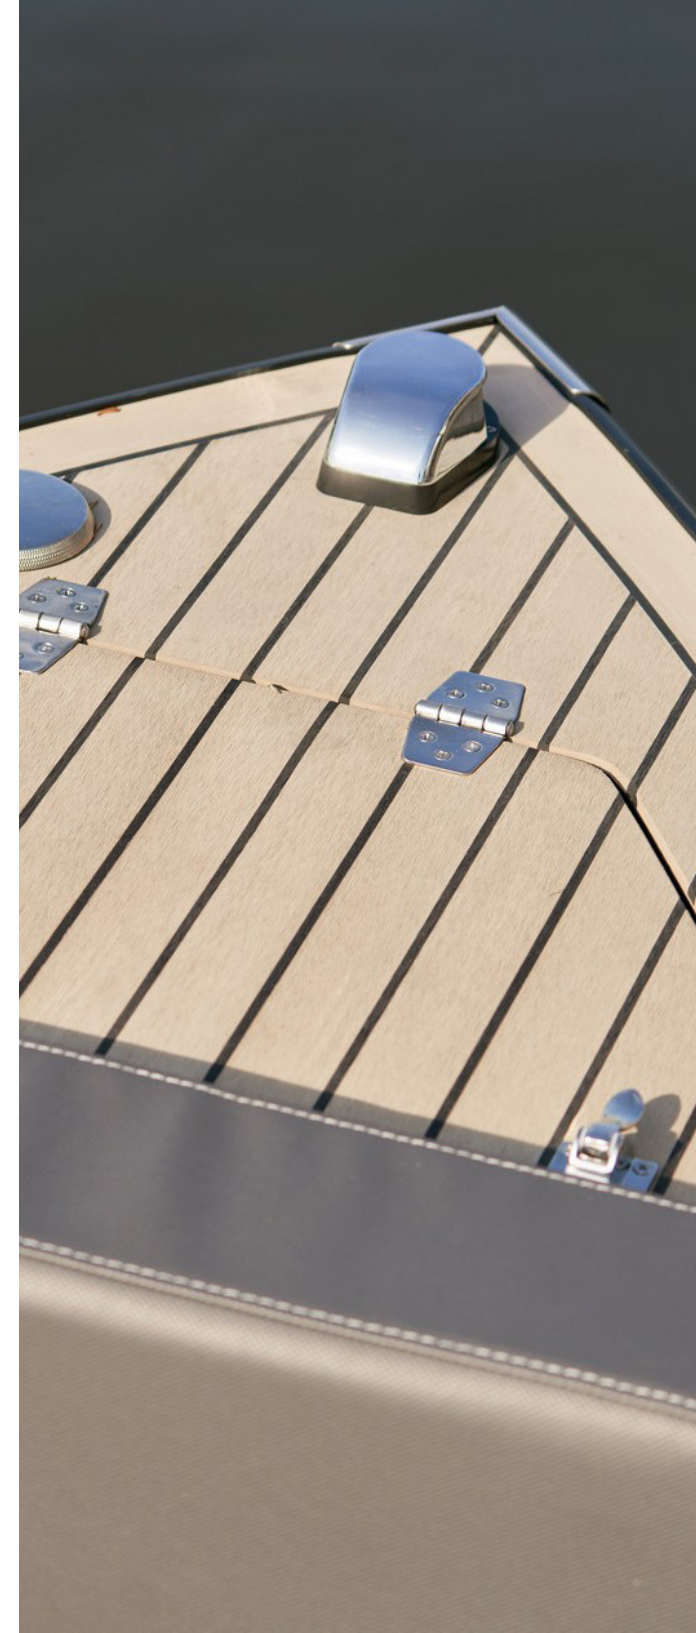

Aluminium motorboat the ZX20L model

The ZX20L is a luxury motorboat with a built-in outboard engine, perfect for trips in a group of up to 8 people. It is characterized by stability and excellent steering.

Specification

Length	6,6 m
Width	2 m
Weight	800 kg
Draft	0,2 m
Engine	max 50 HP outboard engine or electric engine
Material	marine aluminium
Capacity	8
Kategoria	C E

A luxurious motorboat

The ZX20 L motorboat is a unique boat made of high-quality aluminium. There are comfortable seats on the deck, perfect for spending time on the water with family and friends. The interesting and attractive design of this luxury motorboat is complemented by useful amenities. In the standard version, the ZX20 L comes with a set of airbags, hydraulic steering and a pain coating in the selected colour. The boat has navigation lights, a battery, a 12 V socket and a USB socket on the console.

More space

Thanks to its unique structure, this motorboat with built-in outboard engine offers a lot of space to relax. There are practical and spacious compartments under the seats. With a length of 6.6 meters and a width of 2 meters, the boat weighs only 800 kg!

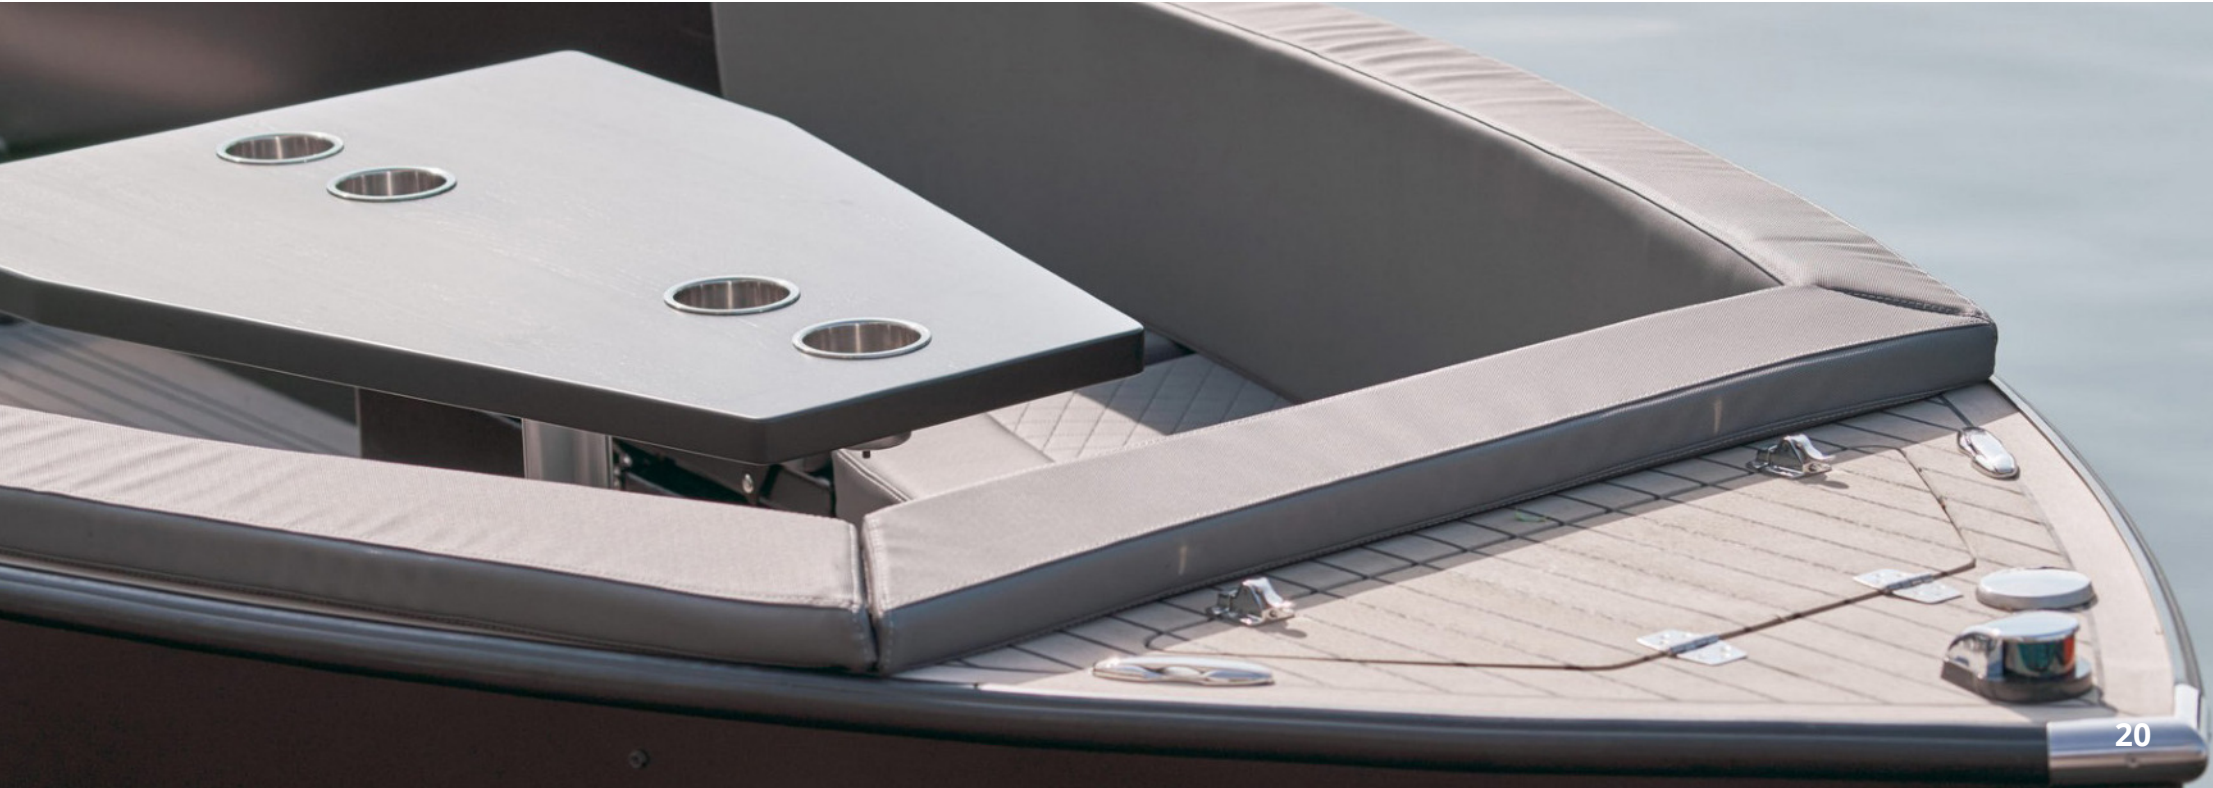

Personalisation

In the ZX20 L model, you can freely adjust the colours, engines, upholstery and floor to your preferences. The user can additionally equip the boat with, for example, a sun visor, underwater lighting, an additional battery, shore power connection, as well as a refrigerator and a swimming ladder. There is also a choice of an electric or gas engines.

ZX25

Aluminium motorboat the ZX25 model

The aluminium motorboat ZX25 model, is ideal for family and social trips on the water, offering space for ten people and equipped with an additional bathroom area.

Specification

Length	7.72 m
Width	2.5 m
Weight	1300 kg
Draft	0.3 m
Engine	max 200 HP outboard engine or electric engine
Material	marine aluminium
Capacity	10
Category	C

All-day excursions

This aluminium motorboat is the perfect choice for all-day excursions on the water. The unit measures 7.72 meters in length and 2.5 meters in width, which allows it to accommodate up to ten people, making it ideal for trips with a larger group of family, friends or for business meetings.

An aluminium motorboat with convenient solutions

When developing the ZX25 model, we focused on well-thought-out solutions that make activity on the vessel a pure pleasure. In the bow there is a large space to sit at the table, while in the stern there is a couch that allows pleasant sunbathing. The aluminium motorboat model ZX25 is also characterized by a closed engine compartment and a comfortable toilet. The maximum engine power dedicated to this model is 200 HP. The boat weighs only 1,300 kg.

RX30

Aluminium yacht the RX30 model

A fully equipped kitchen, a comfortable space for rest, and a bathroom area with a shower are the advantages of the RX30 model - a nine-meter cabin motor yacht. Together with a spacious sunny deck and an underdeck space equipped with a dining area and a sleeping area, we get a luxurious watercraft.

Specification

Length	9,5 m
Width	2,9 m
Weight	5000 kg
Draft	0.45 m
Engine	450 HP (inboard engines)
Material	marine aluminium
Capacity	8
Category	C

Maximum comfort

The RX 30 model is a boat with a modern design that will provide everyone with an amazing swimming experience and comfortable conditions for spending time on the water. On the main deck you will find a control console, a comfortable day bed and a sofa with a table.

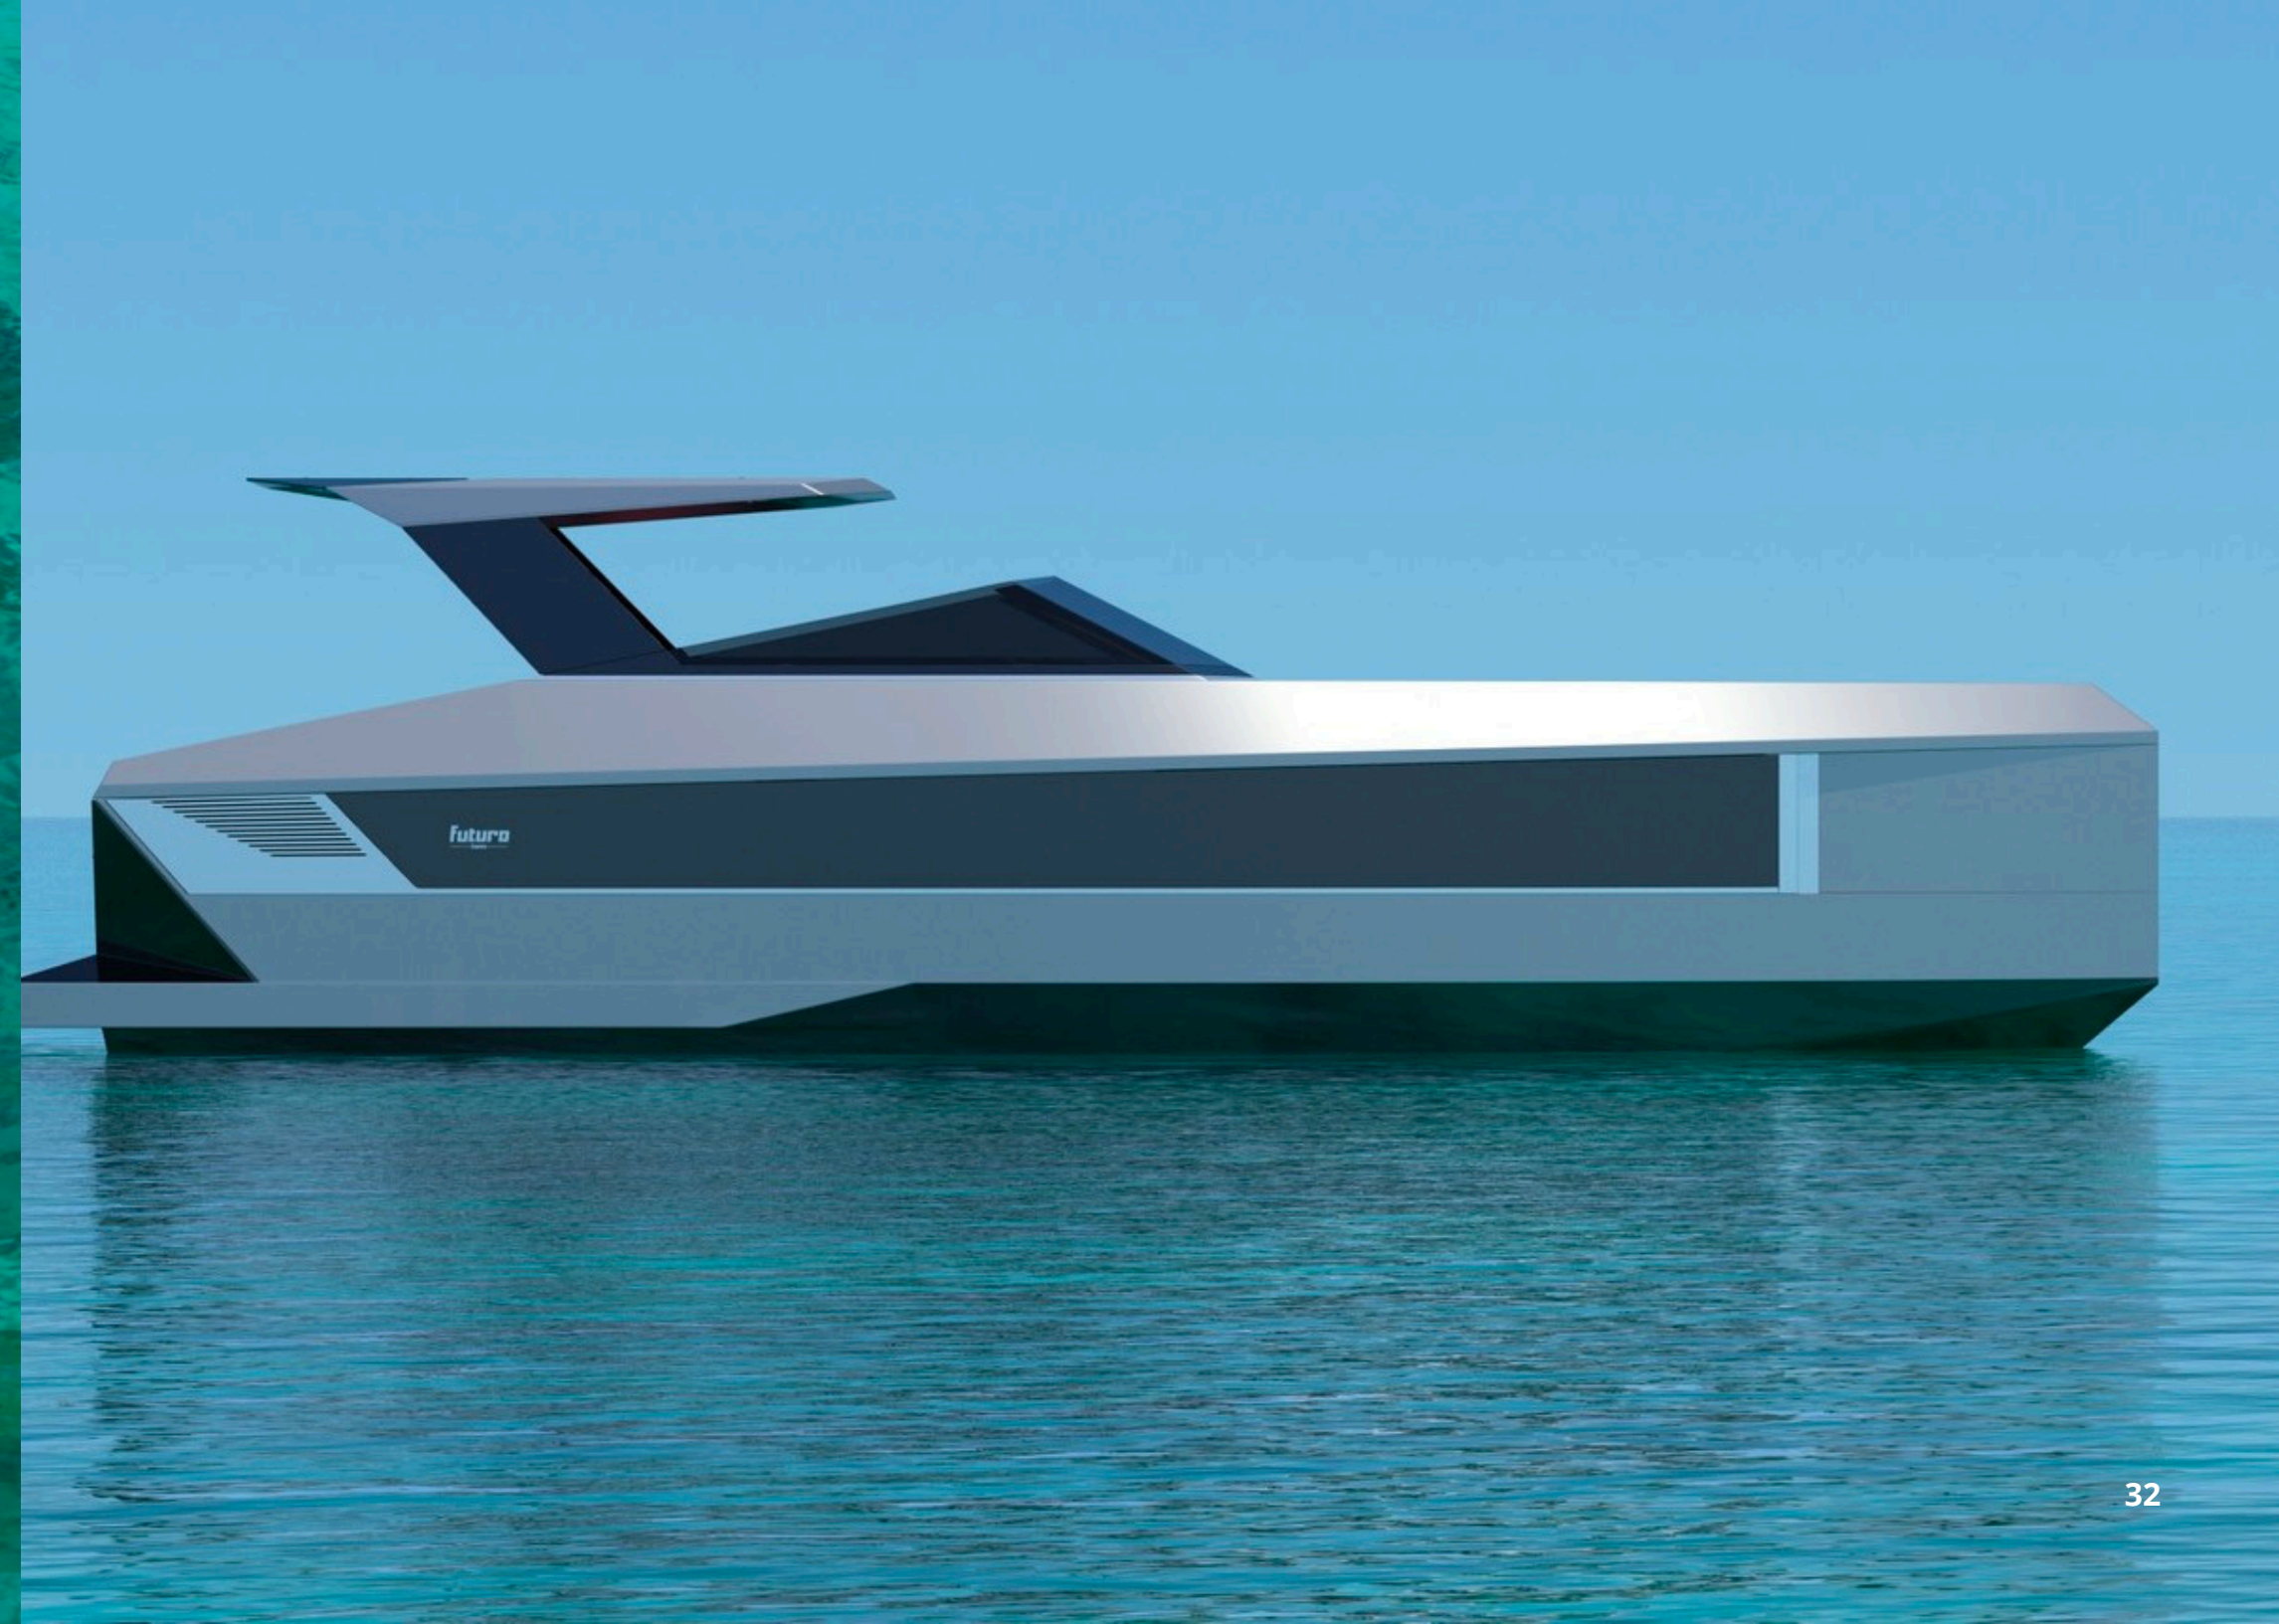

Perfect handling

The RX30 model is characterized by excellent handling and stability. Despite its large dimensions the aluminium hull of this cabin motor yacht provides lightness and versatility, the weight of the unit is 5000 kg. The maximum engine power is 450HP.

A cabin motor yacht with kitchen and bedroom

Below the sun deck of this cabin motor yacht, you will find a spacious open-plan lounge with a sofa and a fully equipped kitchen area. The RX30 model provides as many as four comfortable sleeping places – two are located under the deck with a full-size bed, and additional two are created by opening out the bow sofa. The cabin is well lit by natural light coming through the large windows, which at the same time provide a beautiful spatial view. The cabin has a separate bathroom with shower and toilet.
